Who the frack are Agent 47?

Agent 47 (Spelling: 4GEN7) are a five-piece rock / metal band from Manchester, England. Formed in 2011 and still going strong. Two time Bloodstock metal to the masses heat winners.

Mixing influences from Grunge, Metal, Blues and Punk with our own "Anything Goes" attitude our music is varied and dynamic. We became a five-piece in 2021 to incorporate a fuller sound with more dynamic range.

We have played shows across the northwest and even so far as Wales over the last decade and have released one EP and four singles between 2018 and 2022.

The band also host a successful annual event in Manchester called SummerSlammer.

AGENTS:

Rik Hunter - Vocals / Bass
Daniel Pass - Guitars
Mike Robson - Guitars
Mark Wheeler - Guitar, Vocals, Keys
A.J - Drums

"A Rage Against The Machine / Alice In Chains / Corrosion Of Conformity influenced sound that got me jigging along and took me back my formative years! They were really tight and very bloody good." - Ever-Metal.com

Press Snippets

"**4GEN7** (agent 47) are another band well known locally. A decent set with some good groovy songs and riffs, punctuated with some good crowd interaction and a few wall of deaths. I had a feeling that they might buck a notable trend of later bands capturing" - Ghost Cult Mag the crowd vote and winning it from the second slot. M2TM Burnley 2019.

"The party warms up nicely during opening act **Agent 47**'s pulsating set. Songs such as Don't Waste Your Breath, Suffer and Oblivion are groove-laden slabs of alt rock featuring elongated distorted guitar licks alongside catchy rock riffs. In places, the sound is reminiscent of **Faith No More** in its willingness to incorporate experimentation while maintaining a focus on accessible memorable rock songs." - getintothis.co.uk on supporting Deified in St. Helens.

"Manchester is buzzing with excitement and many new and local bands are getting noticed due to this buzz. One such band is Agent 47 who have released their self-financed debut EP *Who's That?* in April of this year to local acclaim. Stating Deftones, Tool and Corrosion of Conformity as influences, the three tracks on the EP certainly realise the potential that this band have. They share a love of pop-culture, movies, comics, music, video games and technology which are very much explored in the music ("*One Bad Day*" being based on Alan Moore's *The Killing Joke* graphic novel) from time to time. This is a band where anything is on the table" stylistically." - Moshville Times on the release of "*Who's That?*"

Agent 47 are proud to support and be played regularly on:
